Hi Jon, John,

Following up from yesterday's team meeting, I requested a dioxin summary from McKesson (see email below). Please verify and complete the industrial soil risk/exposure scenario analysis. We can discuss path forward options at the next team meeting and also let me know if additional information is needed, thanks.

- <Dioxin Questions - signed.pdf>: Items #5, 6, 7, 8 discusses the boundary samples outside excavations, confirmation samples inside excavations, backfill samples, and topsoil coverage.
- <Arkwood - Dioxin data.pdf>: Maps on pdf p.17-18 is a visual display of the results outside and inside the various excavated cells, prior to backfill and topsoil. Analytical details in tables afterwards.

Thanks,

Stephen L. Tzhone

Dioxin Questions - signed.pdf

Arkwood - Dioxin data.pdf

Stephen,

Shawn Ghose asked for some information regarding dioxin a couple of years ago. At that time, I wrote a letter describing the dioxin sampling and concentrations detected at the Arkwood site. In addition, I provided the data in handwriting on a site map for reference. Both of these documents are attached for your reference.

Jean
